*The Anui Valley. In ancient times, a hidden cavern formed in the interior of the Anui ridge; gradually it widened and deepened under the influence of water flows. When the river valley became deeper, the cave came out into the open. The Denisova Cave in Altai – a research site of the Novosibirsk-based Institute of Archaeology and Ethnography – is 20 years old. The Denisova Cave – a unique archaeological site – is about 300,000 years old*
